rkaminsk update makefile ... on Nov 7, 2022 **1,816**

.github	fix typo [skip ci]	8 months ago
app	make new functionality available via API	9 months ago
clasp @ 4c708a7	update clasp and changes	8 months ago
cmake	reformat clingo python module	8 months ago
doc	make spacing consistent	3 years ago
examples	make new functionality available via API	9 months ago
libclingo	fix #396	7 months ago
libgringo	bump catch requirement to 3.1	8 months ago
libluaclingo	remove CSP prototype	last year
libpyclingo	fix AST comparison	8 months ago
libreify	bump catch requirement to 3.1	8 months ago
scratch	add script to prepare release bundle	6 months ago

About

🤔 A grounder and solver for logic programs.

Clingo: A grounder and solver for logic programs

Clingo is part of the Potassco project for *Answer Set Programming* (ASP). ASP offers a simple and powerful modeling language to describe combinatorial problems as *logic programs*. The *clingo* system then takes such a logic program and computes *answer sets* representing solutions to the given problem. To get an idea, check our Getting Started page and the online version of clingo.
